

GOOD BEEKEEPING PRACTICES | Record-Keeping

Monitoring Tools

Use a recording solution that fits to your needs

The size of the apiary and the production orientation are key parameters for determining the modalities and the features of the record-keeping system to be adopted.

Small enterprises may use manual record-keeping complemented by computer data storage systems whereas large commercial beekeeping businesses may well opt for hand-held devices and QR code for monitoring the activities through information technology.

step
1

One example of own way of recording is putting labels and colourful pins on the external surface of the hive or mating box.

step
2

Additional information can be coded using stickers, labels, etc. on the internal surface of the hive or mating box.

step
3

A good idea is to save the obtained data in digital formats. It will secure your records for a prolonged period.
